

White Paper – MewDonald's (\$MEWDON)

Fast Food Cooking Cat Meme Coin on Solana Blockchain | Version 1.0

Based on official website: <https://mewdon.site/> | July 2026

Executive Summary

MewDonald's (\$MEWDON) is a meme coin project themed around a fast-food cooking cat, built on the Solana blockchain. The project tells the story of Chef Mewdon — a hardworking feline who quits his traditional job and launches his own decentralized franchise on blockchain. He now flips \$MEWDON tokens instead of burgers. Key features include 0% transaction tax and fully burned liquidity pool (LP). The token was launched via pump.fun with plans to graduate to Raydium. Mewdon combines humor, strong community engagement, and a clear development roadmap that includes mini-games, merchandise, partnerships, CEX listings, and deep lore expansion. Long-term vision: Establish \$MEWDON as the official currency of the internet's hungry cats.

1. Introduction

The meme coin space on Solana is highly competitive and often dominated by short-lived hype projects. Many tokens lack compelling narratives, transparency, or long-term plans. MewDonald's differentiates itself by creating a fun, relatable story around a cat chef while maintaining strong technical foundations: zero taxes, burned liquidity, and community-driven growth on the fast and low-cost Solana blockchain.

2. Background & The Story of Chef Mewdon

“Meet Chef Mewdon, the hardest working feline in the fast-food industry.” For years, Chef Mewdon worked in a human fast-food kitchen, flipping burgers, frying fries, and serving shakes for minimum “claw-wage.” One day, he had enough. He knocked over a tray of cups (for dominance), walked out of the kitchen, and launched his own decentralized franchise directly on the Solana blockchain. Now, instead of flipping beef patties, Chef Mewdon is flipping \$MEWDON tokens, building a global army of hungry cats, and ensuring liquidity is locked tighter than a restaurant safe.

3. Problem Statement

Many meme coins impose high taxes and carry rug-pull risks due to unlocked or unburned liquidity. Most projects rely solely on hype without meaningful narratives or development roadmaps. Crypto communities seek projects that are entertaining, transparent, and offer real engagement beyond speculation. Solana needs high-quality meme projects that fully leverage its speed and low fees. Mewdon addresses these issues with a humorous yet serious approach backed by clear mechanics and future utility plans.

4. Solution: MewDonald's (\$MEWDON) on Solana

Core Features:

- **Blockchain:** Solana (high speed, low fees)
- **Transaction Tax:** 0%
- **Liquidity Pool:** Fully burned
- **Launch Platform:** pump.fun (fair launch via bonding curve)
- **Target Graduation:** Raydium + Jupiter aggregator

The project positions holders as loyal “customers” in the Mewdon universe — not just investors, but part of a growing global community of hungry cats.

5. Tokenomics & Mechanics

- **Tax on Transactions:** 0%
- **Liquidity:** Burned (permanently removed from circulation)
- **Initial Launch:** pump.fun bonding curve
- **Future Tokenomics Enhancements (planned):** Transaction burn mechanisms, Community treasury, Holder voting for burns, airdrops, or charity initiatives.

6. Roadmap – The Drive-Thru Plan

Phase 1: Kitchen Prep & Launch

Launch on pump.fun, aggressive community shilling on X (Twitter), Graduation to Raydium upon reaching bonding curve target, Token verification and initial listings.

Phase 2: Building Momentum

Meme contests and trending campaigns, Community “Drive-Thru” raids, Influencer collaborations.

Phase 3: Building the Mewdon Empire

Release of “Mewdon’s Employee Handbook”, Mini-games and Telegram bot integration, Merchandise drops and IRL events, Strategic partnerships with other cat/food meme projects.

Long-Term Vision

Major CEX listings (e.g., Coinstore, MEXC, and larger exchanges), Lore expansion (comics, animated shorts, wiki/Notion page), Position \$MEWDON as the go-to currency for internet cat culture.

7. Future Development Plans

App & Mini-Games, Merchandise, Partnerships & Collabs, Tokenomics Upgrades, Lore Expansion.

8. Community & Engagement

Mewdon is built as a community-first project. Daily engagement is encouraged through meme contests, X (Twitter) raids, mini-games, and merchandise giveaways. There are no traditional human managers — the project is driven by the collective energy of the “global army of hungry cats.”

9. How to Participate

Download the Phantom wallet, Acquire SOL, Visit pump.fun, connect your wallet, and Swap SOL for \$MEWDON. After graduation to Raydium, trading will be available via Jupiter and other Solana DEXes.

10. Conclusion

MewDonald's (\$MEWDON) is more than a typical meme coin. It is a story, a community, and a movement wrapped in humorous fast-food cat branding. With strong technical foundations (0% tax + burned LP on Solana) and a clear roadmap toward utilities and sustained engagement, Mewdon has the potential to become a lasting and evolving project in the Solana ecosystem.

Important Disclaimer: This white paper is prepared based solely on information available on the official website <https://mewdon.site/> as of July 2026. Meme coins are highly speculative and carry significant risk. Token prices can fluctuate dramatically. At the time of writing, the official contract address had not yet been published on the website. Always conduct your own research (DYOR), verify the contract address on a blockchain explorer, and only invest funds you can afford to lose.
